Debugging Printer Driver using WinDbg.

Posted by Anmol Kumar - 02 May 2012 - 12:02

Hello All,

I have to develop printer driver. For the same I am using the already developed samples provided by WDK.

Now the question is how can I debug those driver with one of my printer. My printer is printing correctly.

Welcome if anybody can share some of the good links explaing the requirement from start.

Anmol
